FOR IMMEDIATE RELEASE:

DocuMatix Announces SurveyMatix

SALT LAKE CITY (September 19, 2008) - DocuMatix, LLC announced today the availability of a new product called SurveyMatix. SurveyMatix is a complete turn-key solution for creating on-line surveys.

SurveyMatix comes complete with advanced features such as Skip logic, and up to 16 different question types/elements in one of the most powerful *drag and drop* wizards built for a web browser. Online surveys created with SurveyMatix can be published as a web site survey, or as a link within an email. Additionally, SurveyMatix integrates with the DocuMatix Email Manager to allow customers to link to their survey via a graphic or simple link that can be tracked for reporting purposes. Reports are available via a powerful real-time reporting engine that allows for data to be viewed by web site responses, email response, or both.

SurveyMatix is available as a stand-alone product, and is also a standard application within the DocuMatix Product Suite.

About DocuMatix
